Operating Procedure Manual

Kerchan Technology Co., Ltd

Indexes

01	•	Install Software	2-3
02	•	Configure K-Smart to start automatically on boot	3-5
03		Update / upload videos into screen	6

Note:

The following operational steps must be performed on a Windows computer; they cannot be executed on a MacBook. Otherwise, uncertainties may arise, leading to potential failures.

Step 1: Download the K-Smart software package from our official website or we send you by Email.

Step 2: Save the software package in your USB or SD card. (Please ensure that your SD card or USB is 2.0 compliant.)

K-Smart_DEFAULT_RK3288_V3.0.0_20200806sign.apk

- MediaPlayer_DEFAULT_V2.0.1_20221216sign.apk
- Step 3: Insert the SD card or USB containing the K-Smart software package into the screen's port.
- Step 4: Locate the K-Smart software package in the file directory on the LCD screen.
- Step 5: Click the software icon to commence the installation.
- Step 6: Launch K-Smart by double-clicking the desktop icon or finding it in the Start menu.

Step 6: When you see the screen says "There is no video file in the USB disk or SD card"

Note:

Following Part 1 and Part 2, if the screen displays "No video files found on the USB disk or SD card," proceed to Part 3 to upload or update videos onto the screens.

Step 1: On your Windows PC (not MacBook), create a folder named "adplayer."

Step 2: Open the "adplayer" folder and create a subfolder named "0."

🔶 🔿 🗸 🛧 💄 > adplayer				
		~ 名称	类型	
★ 快速访问				
■ 桌面	*	0	文件夹	
➡ 下载	*			
🖹 文档	*			
▶ 图片	*			

Step 3: Place your videos in the "0" folder. Ensure that the video resolution is 1920*1080, and the video formats are MOV and MP4.

Step 4: Save the "adplayer" folder onto your USB or memory card.

Step 5: Insert your USB or memory card into the screen; your new videos will automatically be saved to the screen's internal memory, replacing the old video contents. The new videos will play in a loop.

Step 6: Remove the USB or memory card from the screen.
